

## **SECTION 3 - BILLING CLASSES OF POTABLE SERVICE**

All potable service connection types shall be classified as domestic, private fire, combined, interim and/or supplemental for billing purposes.

### **3.1 Domestic**

Includes all service connections through which water is delivered for all purposes permissible under the law except private fire protection and construction service.

### **3.2 Private Fire Service**

Includes all service connections through which water is delivered to private property for fire protection exclusively.

### **3.3 Combined Service**

Includes all service connections through which water is delivered for domestic use and for onsite private fire protection.

### **3.4 Construction Service**

a. Includes permanent or non-permanent connections for delivery of water for use during the construction of new development, additions to existing improvements, sand and gravel operations, and other construction uses, such as grading and compaction, paving, and dust control.

b. Construction services may not be used to avoid installation of a permanent water service connection for permanent irrigation, long-term dust suppression, or domestic service, or private fire service.

Water from construction sites is prohibited from flowing continuously into public streets, pathways, roadways, and sidewalks.

### **3.5 Supplemental Service**

Includes all domestic or combined connections from which water is delivered for domestic purposes to properties that are also provided water from any other source. This section shall not apply to properties that are served by a domestic well, as identified in NRS 534.
