This Section for LVVWD

Name of Engineering Services Reviewer: _____ Date: _____

LVVWD Comments: _____

- This site's point(s) of public water supply is/are already protected with the required backflow prevention; therefore a fire sprinkler system with a chemical additive may be installed.**

LVVWD Engineering Services Date

- This site's point(s) at the public water supply will be protected with the required backflow prevention per the approved civil plans (LVVWD Project No. _____). Once the backflow prevention assemblies have passed LVVWD inspection and testing, then chemical additives may be installed on the fire sprinkler line.**

LVVWD Engineering Services Date

- This site's point(s) at the public water supply does not have the required backflow prevention; therefore a fire sprinkler system with a chemical additive may not be installed.**
