

SECTION 3 - BILLING CLASSES OF SERVICE

All service connections shall be classified as domestic, private fire, combined, construction, and/or supplemental for billing purposes.

3.1 Domestic Service

Includes all service connections through which water is delivered for all purposes permissible under the law except private fire service and construction service.

3.2 Private Fire Service

Includes all service connections through which water is delivered on to private property for fire protection exclusively.

3.3 Combined Service

Includes all service connections through which water is delivered for domestic use and for on-site private fire protection.

3.4 Construction Water

- a. Includes permanent or non-permanent, metered connections for delivery of water for use during construction of new development, additions to existing improvements, sand and gravel operations, and other construction uses, such as grading and compaction, paving, and dust control.
- b. Construction services may not be used to avoid installation of a permanent water service connection for permanent irrigation, long-term dust suppression, domestic service, or private fire service.
- c. Under critical or Emergency Operating Conditions, permits will be issued as needed for the temporary use of hydrant meters for construction water.

Water from construction sites is prohibited from flowing continuously into public streets, pathways, roadways, and sidewalks.

3.5 Supplemental Service

Includes all domestic or combined connections from which water is delivered for domestic purposes to properties that are also provided water from any other source. This section shall not apply to properties that are served by a domestic well, as identified in NRS 534.
